CONTROL OF COMMUNICABLE DISEASE

The Board of Education recognizes that control of the spread of communicable disease as defined by the New Jersey State Department of Health is essential to the well-being of the school community and to the efficient operation of the schools.

The Board is bound by the statutes and by rules of the State Board of Education:

- § For the exclusion and readmission of pupils who have contracted a communicable disease;
- § For the exclusion and readmission of teachers and pupils who have been exposed to a communicable disease; and
- § For the instruction of teachers in health and the prevention of disease.

The Board will direct the administration and staff to comply with regulations of the New Jersey Department of Health and the Bernards Township Board of Health governing the prevention, control, and reporting of communicable disease.

The teacher may exclude from the classroom and the principal or his or her designee may exclude from the school building any pupil who appears to be ill or has been exposed to a communicable disease. A pupil may be isolated in school to await the arrival of or instructions from an adult member of his or her family or the family's agent. If the school medical inspector or the school nurse is present in the building, his or her recommendation shall be sought before any such exclusion or isolation is ordered.

Any pupil retained at home or excluded from school by reason of having or being suspected of having a communicable disease shall not be readmitted to his or her classroom until he or she presents written evidence that he or she is free of communicable disease. That evidence may be supplied by the school or another qualified physician who has examined the pupil.

No person, pupil or adult, may attend or visit school if he or she has an uncoverable weeping skin lesion.

The Superintendent shall develop procedures for the control of communicable disease that include the instruction of teaching staff members in the detection of disease and measures for its prevention and control; the removal from school premises to the care of a responsible adult of pupils identified and excluded in accordance with this policy; the preparation of standards for the readmission of pupils who have recovered from communicable disease; the provision of appropriate home instruction to excluded pupils in accordance with law; and the filing of reports as required by law.
